Nicholas Spudich
Software Developer

Experience

05/2022 - 09/2023
ForceOne Merchandising
Software Developer / Analyst

- Sole developer in Microsoft SQL Server database migration. Rewrote and converted MySQL procedures, views, and tables.
- Conducted transfer of web app services from AWS to Microsoft Azure. Contributed to the setup of CI / CD workflows using GitHub as a source control. Set-up Azure Functions with triggers for daily imports, blob services for photo storage, and ensured the safe deployment of 74 pull requests. Deployed .NET Framework 4.8 web app to 300+ personnel for daily merchandising operations.
- Collaborated with team to quickly identify problem stores and streamline data collection for Power BI report automation resulting in 50% reduction in administrative task time.

07/2022 - 01/2023
Cleveland Cliffs Inc.
IT Software Developer

- Member of 10+ man team that developed, tested, and integrated ASP.NET application for tracking steel operations. Oversaw user documentation; creating over 20 detailed HTML web pages.
- Designed and implemented 3 complex tracking reports using Oracle SQL which optimized and reduced response time in removing specialized product.
